

Satori

Resolution Independent - 64 Bit Paint Compositing And Graphics Software Version 2.0 at Siggraph '97

"Satori is more than just a bitmap image editing program....work on individual video frames and with animation celslightning fast, even with image files in excess of 100MB...." 'Highly Recommended' PCG&V review, July 1997

Siggraph '97 (#1602), August 5th 1997, Spaceward Graphics will introduce version 2 of the award winning Satori 64 bit Paint compositing and 2D graphics software for Microsoft Windows NT and Windows '95.

The most powerful object-based environment for 2D graphics design and editing, Satori offers advanced rotoscoping (sequencing), batch processing, layer matting, image retouching and fine art drawing FX. Aardman Animations and many other prominent animation, production and FX Companies have already discovered the creative and productivity benefits of object-based paint and 2D graphics.

'Owzat' by Aardman Animations

'Owzat', Aardman Animations first experimental computer animated film used Satori to generate hand drawn textures and backgrounds. Satori object-based graphics allows animators to edit and re-generate scenes at any new resolution or format for preview and/or final output.

'Starfleet Academy' by Interplay

"Satori has been a tremendous help with Rotoscoping on Starfleet Academy. The software is packed with powerful features and robust tools. It has become an essential tool for compositing."
Tim Holtermann, Interplay Productions Inc.

Version 2 is MMX ready and features the world's first real-time 'slider based' brush drawing undo and redo with brush object editing. Many more high-end tools include object based cut /copy / paste, brush stroke animation, non-square pixel aspect correction, alpha channel brush, emboss and brush FX including redeye removal. For a full feature list see V2.0 new feature highlights.

Direct image exchange and compositing is also provided for Softimage PIC, Lightwave IFF and Adobe Photoshop layers. Version 2.0 will also be presented by NeTpower (# 955) and Carrera (# 3315) using a range of Windows NT platforms including the world's fastest Alpha NT workstations.

Visit booth #1602 to order the show special at \$595 (normal price \$995) and receive the 64 bit option free (saving \$1095).

Visit the Spaceward website www.satoripaint.com to download a save-disabled copy of V2, press images (including menu screens) and a copy of the new feature highlights.
